

SERVICES OVERVIEW

COMPRESSED AIR QUALITY TESTING

CCAS are dedicated to providing industry leading advice and solutions. From a small modification, to a full-scale compressed air system installation, CCAS are ready to undertake any task.

In providing tailored turn-key solutions to its clients, CCAS will:

- Conduct an initial consultation, including on-site visit to discuss requirements
- Provide an air system design based on maximum efficiency and productivity, ensuring future expansion is considered
- Install a system that is tidy, efficient and leak-free
- Provide an on-going servicing and maintenance schedule to ensure the compressed air system continues to perform at its highest level

WHO WE ARE

Specialising in the installation of compressed air filtration systems, including programmed, preventative and breakdown maintenance, compressed air quality and ISO 8573-1 testing, Complete Compressed Air & Safety (CCAS) is proudly Australian owned.

Having operated for over 20 years, CCAS provide cost-effective turn-key solutions across a variety of industries, using only the highest quality equipment and components.

INDUSTRIES & APPLICATIONS

Industrial/Electrical machinery • Automotive • Oil and gas • Industrial gases • Paints and Coatings • Energy/Environment • Food processing/manufacturing • Medical • Pharmaceutical • Chemical • Food service • Packaging and Bottling

RESPIRATORY SOLUTIONS

Employers have a legal obligation to provide a safe work environment for their employees, ensuring they meet all relevant Work Safe requirements. CCAS offers industrial breathable and process air systems that are fully compliant with Australian Standard AS1715:2009.

In addition to assisting organisations in meeting OH&S obligations, breathable and process air systems can save money by:

- Reducing expensive downtime
- Minimising painful rework by reducing the risk of contaminants in air lines
- Lowering energy bills
- Identifying and remedying expensive air leaks

Contact the CCAS team for all your testing, servicing and installation needs.
